Professional Summary

Final-year Data Science and Artificial Intelligence undergraduate at Nanyang Technological University, Singapore (NTU Singapore), with minors in Business (Banking & Finance Specialization) and Communication Studies spanning 60 ECTS across 10 business modules. Experienced in applying quantitative modeling and data analysis to complex business challenges in financial valuation, consumer analytics, and cross-market strategic analysis. Seeking admission to the MSc in International Business: Information Management and Business Intelligence at the School of Business and Economics, Maastricht University, to formalize this applied experience within a structured framework that integrates IT with business intelligence. Having built a leveraged buyout valuation model for a Swedish acquisition target, led quantitative analysis of 200+ consumer survey responses to identify purchase drivers for international market entry, and evaluated competitive positioning across global markets for multinational corporations, this program's curriculum in data management, management information systems, business process management, and business intelligence will consolidate these applied experiences into a rigorous academic framework, preparing for a career bridging technical data teams and executive management in an international business context.

Education

Nanyang Technological University, Singapore (NTU Singapore)

Bachelor of Computing (Honors)

Singapore

Expected June 2026

- Major: Data Science and Artificial Intelligence.
- Minors: Business (Banking & Finance Specialization), Communication Studies.

Academic Snapshot

- GMAT Focus: 595 (88th percentile Quantitative).
- IELTS Academic: 8.5.
- Selected Coursework: Alternative Investments (A), Business Finance (A-), Consumer Insights (A-), Fundamentals of Management (A+), Management Decision Tools (A-), Marketing for the 21st Century (A-).

Professional Experience

School on Cloud (SoC) Asia

Software Engineering Intern

Singapore

Jul 2023 to Dec 2023

A Singapore-based EdTech startup offering digital learning tools, education services, literacy content, STEAM resources, and workshops for preschool learners.

- Contributed to the development of a digital library and educational games serving over 500 preschool learners, using CSS/HTML, JavaScript, and MySQL.
- Developed and deployed machine learning algorithms to analyze user engagement data, providing critical insights that informed product development and content strategy.

Academic Projects

Final Year Project: Multi-Stakeholder Ethical Decision Framework for AI Systems

Aug 2025 to Apr 2026

A computational framework for quantifying ethical risks and trade-offs in global AI deployments.

- Designed a platform to help organizations determine how compliant AI applications are with ethical frameworks, regulatory requirements and stakeholder values.
- Applied the framework to case scenarios (e.g., algorithmic trading, facial recognition) to identify stakeholder conflicts and regulatory trade-offs.

Financial & Strategic Analysis

Nilörngruppen AB (Sweden): Leveraged Buyout Target Analysis

Aug 2025 to Nov 2025

- Built leveraged buyout valuation model incorporating scenario and sensitivity analysis; authored investment memorandum evaluating cross-border value creation and capital structure risk.
- Evaluated competitive landscape, market position, and value creation opportunities for Nilörngruppen AB, demonstrating ability to assess company value in cross-border M&A contexts.
- Developed communication strategies for the investment memorandum, translating complex financial models and risk analyses into actionable recommendations for diverse stakeholders.

Outside (Singapore): International Market & Consumer Analysis

Aug 2025 to Nov 2025

- Led quantitative analysis of 200+ consumer survey responses, identifying critical purchase drivers and market segments to inform strategic decision-making.
- Presented actionable recommendations to management on international market entry and positioning strategy.

Starbucks Corporation: Global Brand & Market Analysis

Aug 2025 to Nov 2025

- Analyzed competitive positioning and market dynamics across international markets, combining Keller's brand equity model with clustering algorithms on market data to identify underserved consumer segments.
- Developed strategic recommendations for management on market penetration and competitive response in a global context.

Delta Air Lines: Crisis Communication Analysis

Jan 2025 to Apr 2025

- Applied sentiment analysis (NLP) to public statements and social media data to quantify stakeholder sentiment during Delta Air Lines' July 2024 system outage, deriving insights for corporate reputation and stakeholder communication strategies.

Cross-Cultural Communication in International Teams

Jun 2024 to Jul 2024

- Applied Hofstede's cultural dimensions framework to analyze and recommend improvements for communication protocols within a multicultural student team (Singapore, Sweden, Australia, China).

Leadership & Extracurricular Activities

NTU Welfare Services Club (WSC): Ignite Change (IGC)

Sep 2024 to Jun 2025

Deputy-Director, Business Managers Subcommittee

- As deputy-director of a team of ten, planned and executed programs, such as the Freshman Orientation Program and Social Impact Week, achieving 95% satisfaction (post-event survey).
- Secured over SGD \$2,500.00 in sponsorships through partnerships with external organizations.

NTU Hall of Residence 12

Sep 2022 to Jun 2023

Vice-Chairperson, Residential Education Subcommittee

- As vice-chairperson of a team of twelve, organized events to foster community engagement among 120+ hall residents.
- Launched and managed a mentorship program for first-year university students to improve their integration into their residential halls.

Awards & Achievements

- CCDS Club TechFest 2025 Top 10 Finalist: Developed "TruthGuard," an AI verification platform combining Natural Language Processing (NLP) and machine learning to authenticate digital content and combat misinformation, while addressing information integrity and its impact on corporate reputation.

Skills

Quantitative & Analytical

- Business Intelligence & Modeling: Built LBO models for a cross-border acquisition target (Nilörngruppen AB), incorporating scenario and sensitivity analysis. Applied Python (Pandas, Scikit-Learn) to analyze 200+ survey responses, using regression to identify critical purchase drivers for international market entry.
- Data Management & Visualization: SQL for database querying and management; Matplotlib and Seaborn for data visualization.

IT & Programming

- Python (Pandas, Scikit-Learn, TensorFlow), R, SQL, Java, C++, CSS/HTML, JavaScript.

Professional

- Strategic Analysis: Cross-border M&A evaluation, international market entry analysis, competitive positioning.
- Stakeholder & Reputation Management: Applied communication frameworks to analyze crisis messaging (Delta Air Lines) and manage cross-cultural team dynamics (international exchange project). Utilized sentiment analysis (NLP) to quantify public perception.
- Project Management: Led teams of 10 to 12 in extracurricular and academic settings; managed project timelines and deliverables.

Languages

- English (Native), Mandarin (Conversational).
